Town of Queen Creek

1st Quarter Law Enforcement Summary

Building Relationships & Solving Problems

Town of Queen Creek
## 2012 Executive Summary

Service Levels ● Incident Response Summary
Response Time Comparison ● UCR Crime Statistics
Notable Changes ● Crimes Rate Comparison

The Uniform Crime Report or UCR is a standardized system for the collection and reporting of crime statistics administered by the U.S. Federal Bureau of Investigation. UCR Part I crimes consist of crimes against persons (homicide, sexual assault, robbery, Aggravated Assault) and crimes against property (burglary, theft, auto theft and arson).

Responding to Challenges

Developing a Successful Work Program

What is monopolizing our time and resources? Top calls for service?

How do we respond to new issues or situations?

Effective vs. Efficient? Prevention vs. Response?

Targeted policing programs?

Collaborative Community Partnerships.

We will continue to develop collaborative partnerships between the Sheriff's Office and the individuals and organizations we serve in an effort to develop solutions to problems and increase overall trust in the police.

Surrounding Police Agencies (Gilbert PD, Mesa PD, PCSO, etc.)

East Valley Fusion Center, ACTIC, Police Chief Network, etc.

O.R.C.A., Specific Q.C. merchants, & business owners

HOAs, Block Watch groups, Property Management companies, etc.

Volunteer Organizations (QC Posses, Explorers, Boy Scouts, etc.)

Schools, Religious organizations, Medical facilities, Libraries, etc.

Town Government, County Agencies, State & Federal Authorities, etc.

Work Program & Problem Solving

The alignment of organizational management, structure, personnel, and information systems to support community partnerships and proactive problem solving

Technology
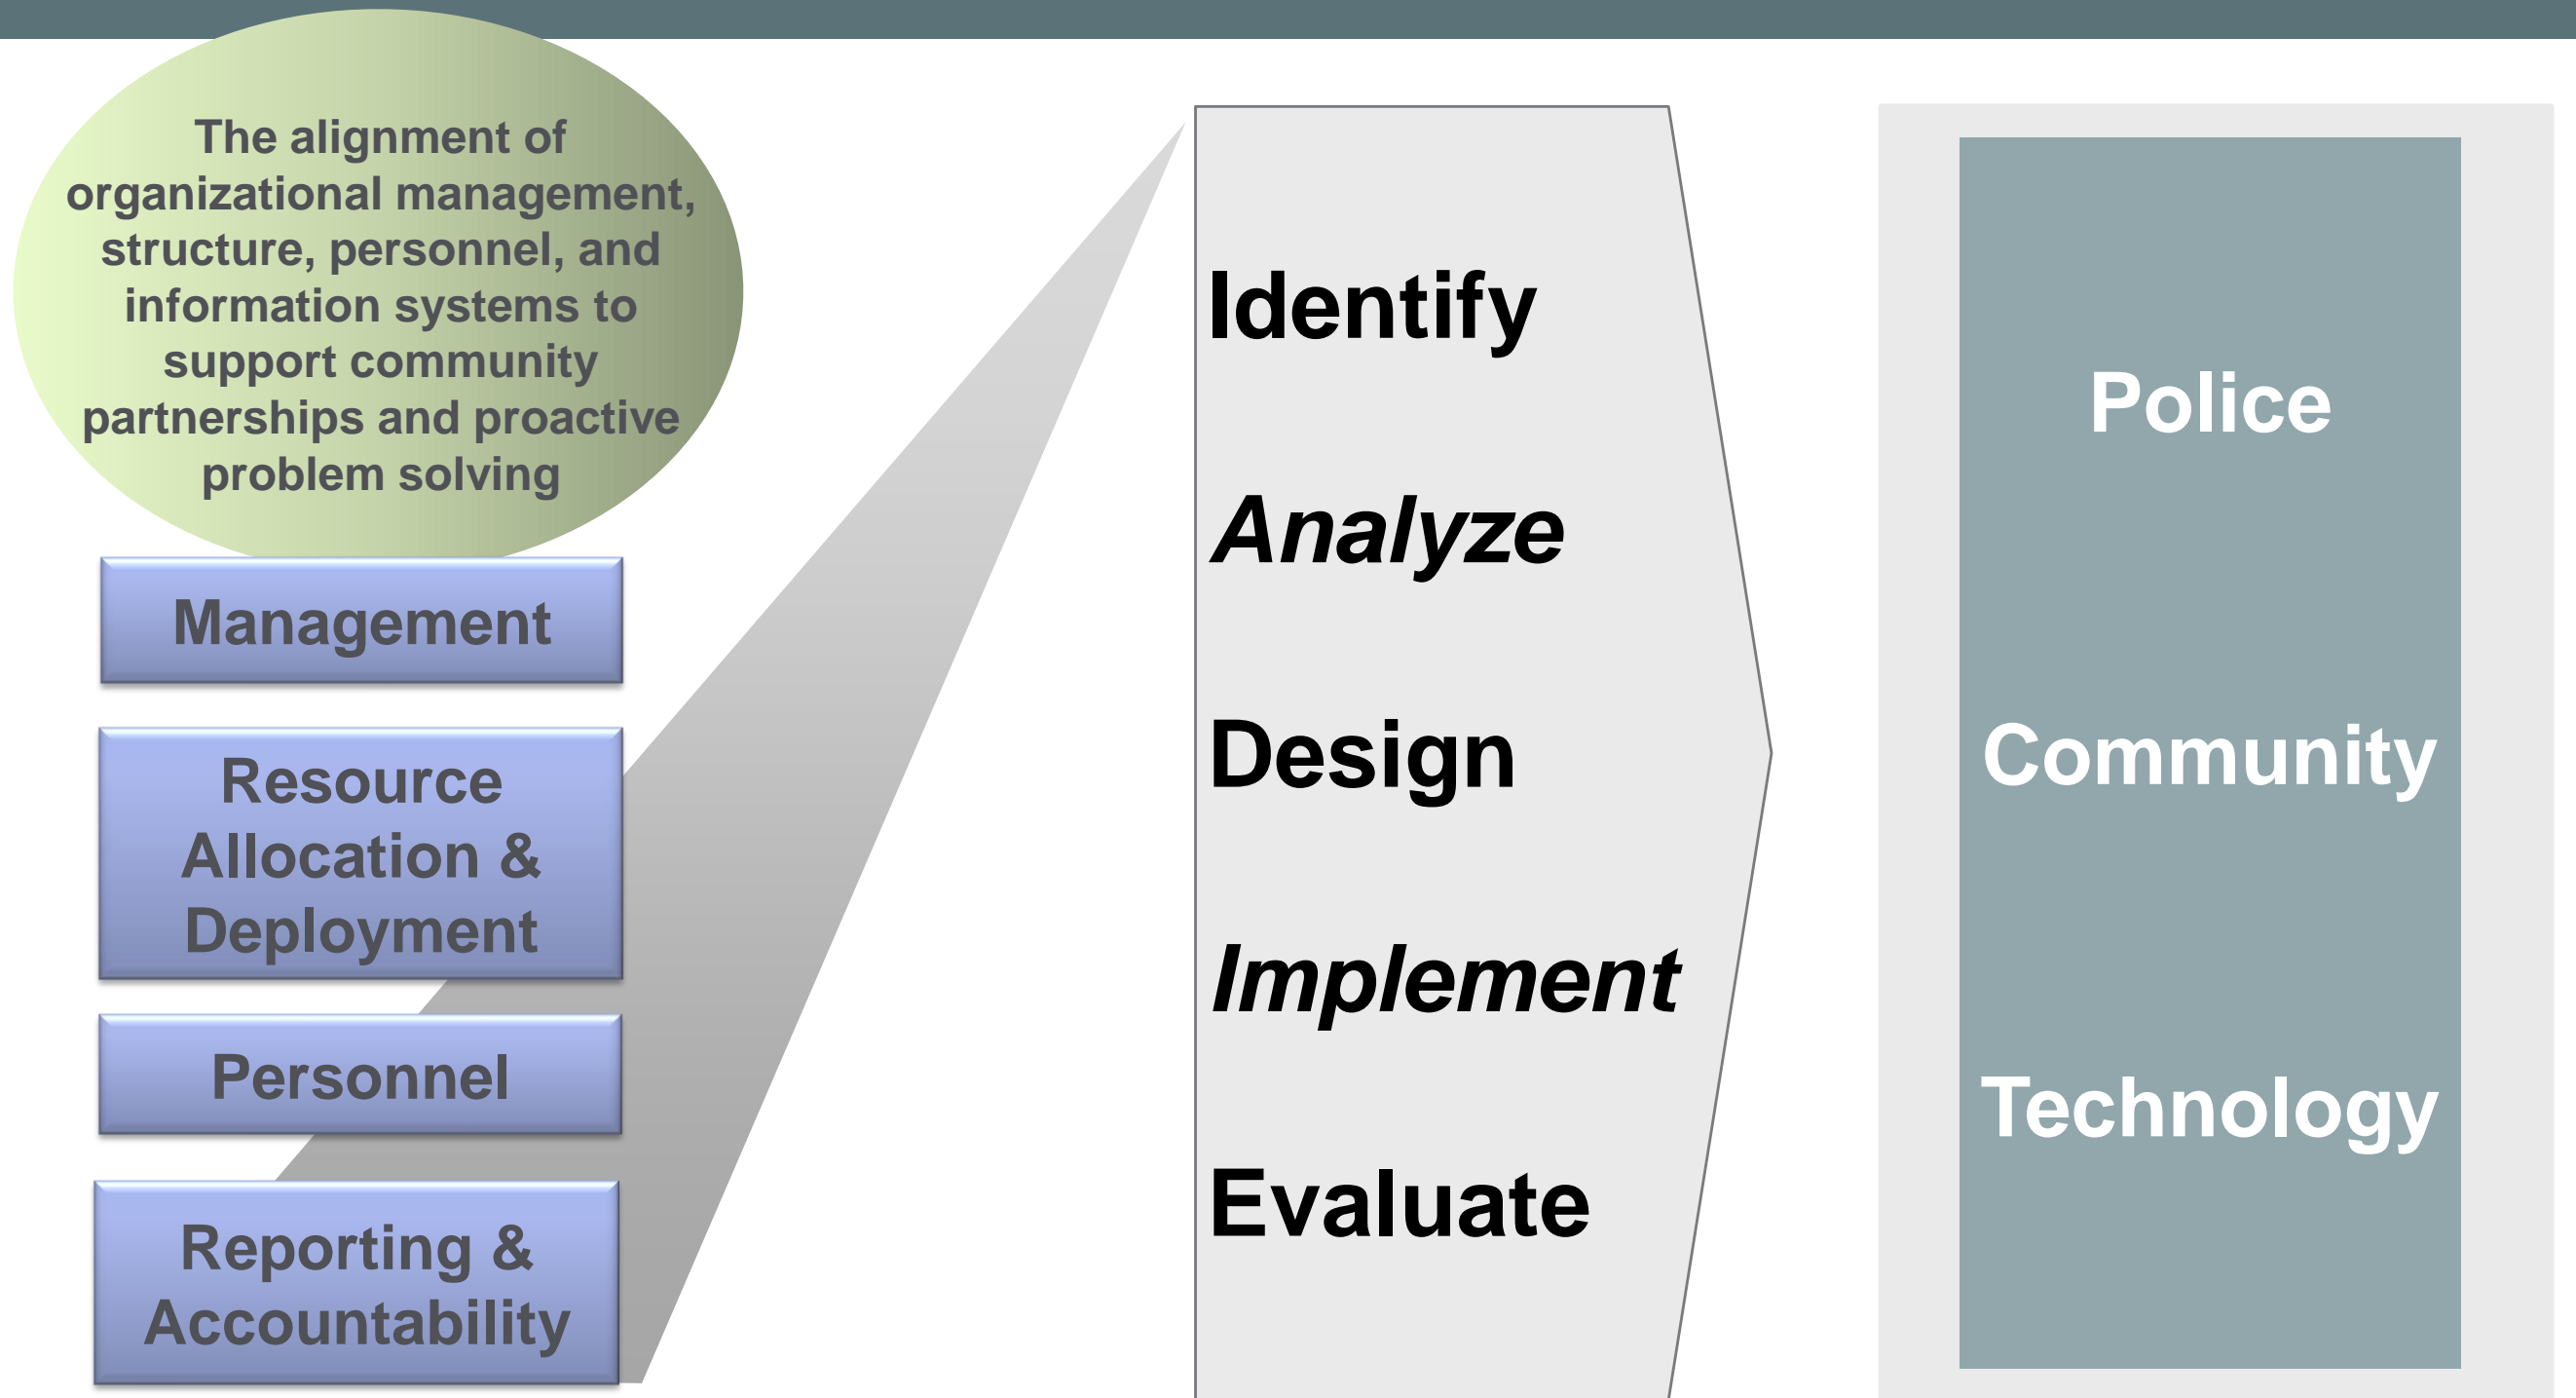

This is a process of engaging in the proactive and systematic examination of identified problems to develop and rigorously evaluate effective responses.

Development of the DDACTS Model

Foundation

DACTS is an operational model that uses integration of location-based crime and collision data to establish effective and efficient methods for deploying law enforcement resources. Using geomapping to identify areas that have high incidences of crime and collisions, DDACTS uses traffic enforcement strategies that play a dual role in fighting crime and reducing collisions and traffic violations. Drawing on the deterrent of highly visible traffic enforcement and the knowledge that crime often involves the use of motor vehicles, the goal of DDACTS is to reduce the incidence of crime, collisions, and traffic violations.

Strategy

DDACTS operational strategies for the Town of Queen Creek will be developed & deployed in phases.

Based on ongoing analysis of certain crime, traffic, & activity trends/density, specific "hot spots" or "zones" will be established on a periodic basis (Predictive Policing methodology)

Patrol units will concentrate directed patrol activity in these areas during unallocated patrol periods, specific "peak" times, & other special detail operations.
