

Roadway Lighting Inspection Schedule

The Town of Queen Creek's Traffic Engineering Division maintains over 4,500 residential and arterial roadway lights. Town Staff try to inspect each residential roadway lighting fixture at least once per month, and each arterial roadway lighting fixture at least once every two months.

- * Private and Gated Communities: Light fixtures in parks and private/gated communities are managed by the neighborhoods' Homeowners Association (HOA).
- * If an inspection is missed due to inclement weather or unforeseen circumstances, the service will be rescheduled to the following week.
- * Roadway lighting issues will be repaired within 10 business days after being found during an inspection or reported to staff through SeeClickFix.

Residents can proactively report roadway lighting issues by visiting: QueenCreekAZ.gov/SeeClickFix
